The Windows Automation Software has inbuilt Video Tutorials and is really easy to understand and use. Do have a close look at the Screenshots to view features offered by the software.

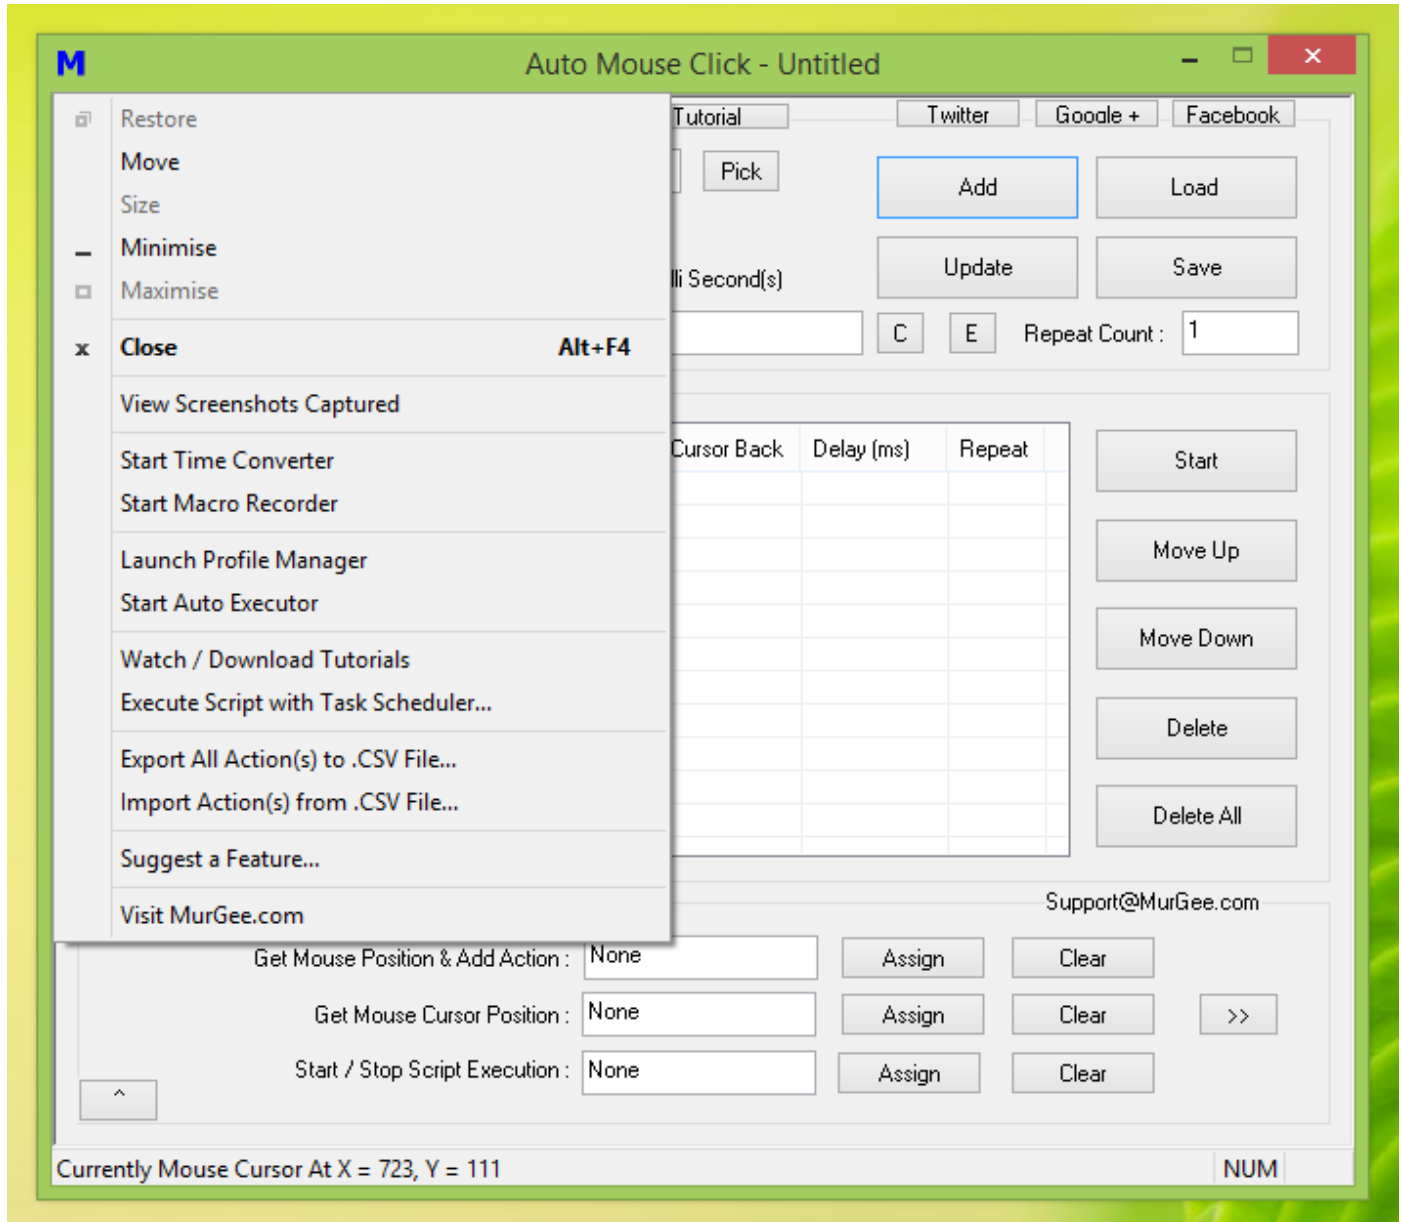

# Right Click Menu

The Given below screenshot displays Right Click Menu which offers functionality to edit and manage Script Actions. There are lots of features available in this Right Click Menu which help you customize the behavior of the software and script actions as well.

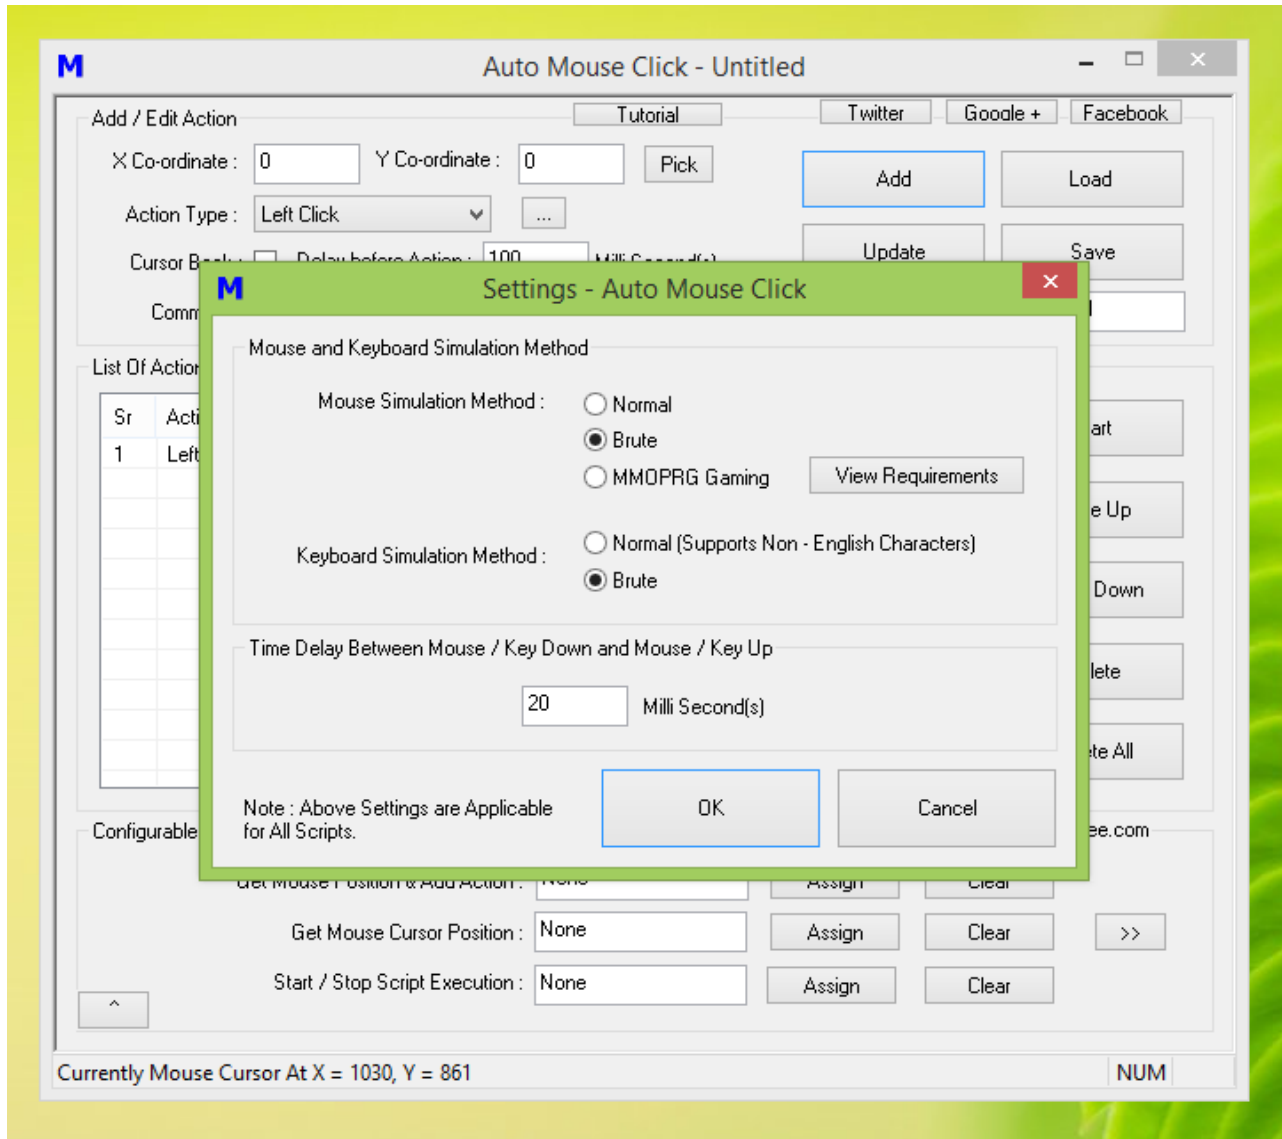

# System Menu

By doing a Left Click on the Top Left Corner of the Software, you can invoke System Menu which offers other features offered by this Windows Automation Software.

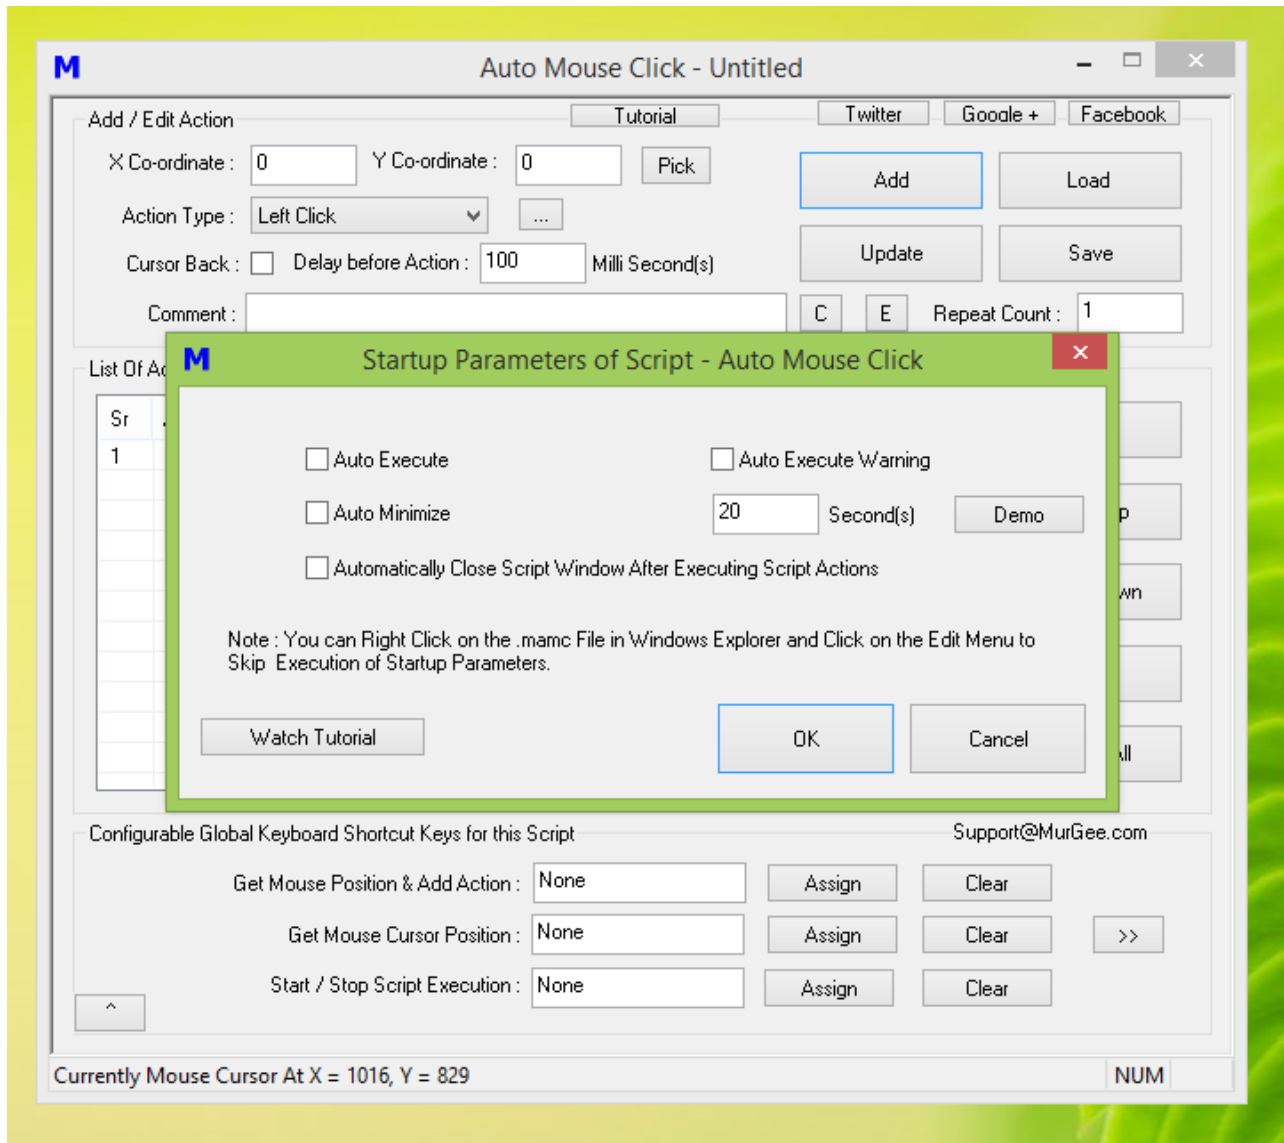

# Settings

The Settings Screen allows you to configure Mouse Simulation method and also allows you to select Key Press Simulation Method.

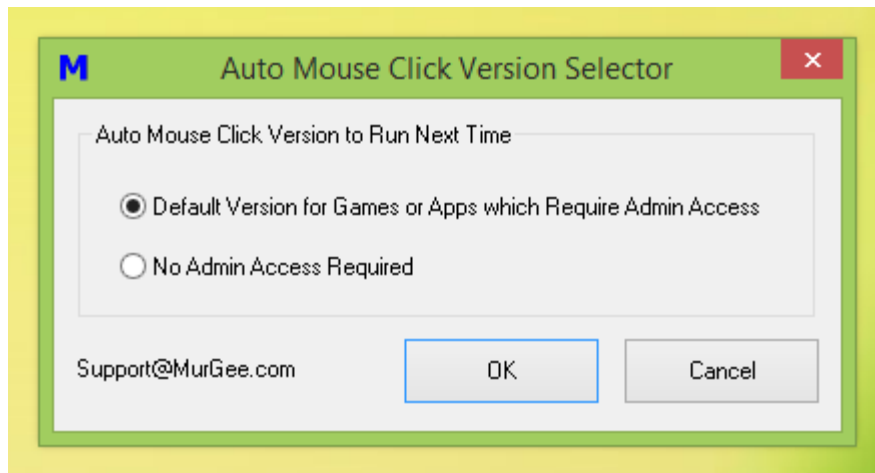

# Startup Parameters

Configure Script Startup Parameters which affect how the Script behaves when it is opened. This can be useful when you want to execute the Script at a Later Date / Time.

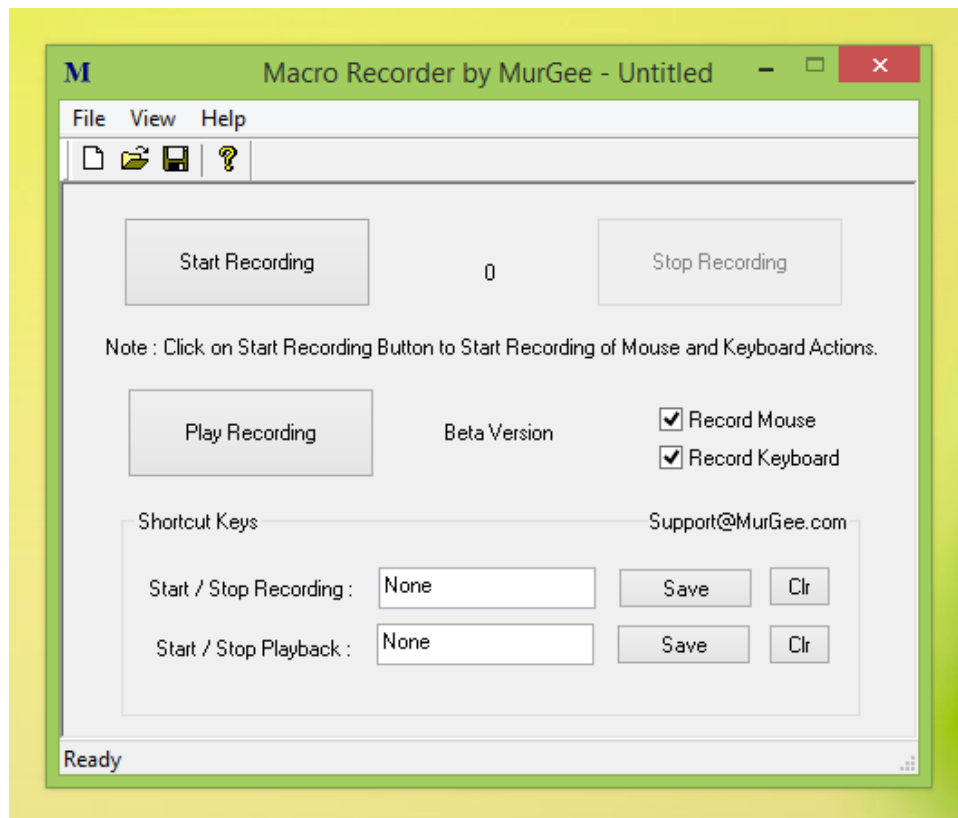

# Auto Mouse Click Version Selector

By default, Auto Mouse Click requires Administrative Rights to Open, however you can use Version Selector to switch it to Non - Admin Version with Version Selector.

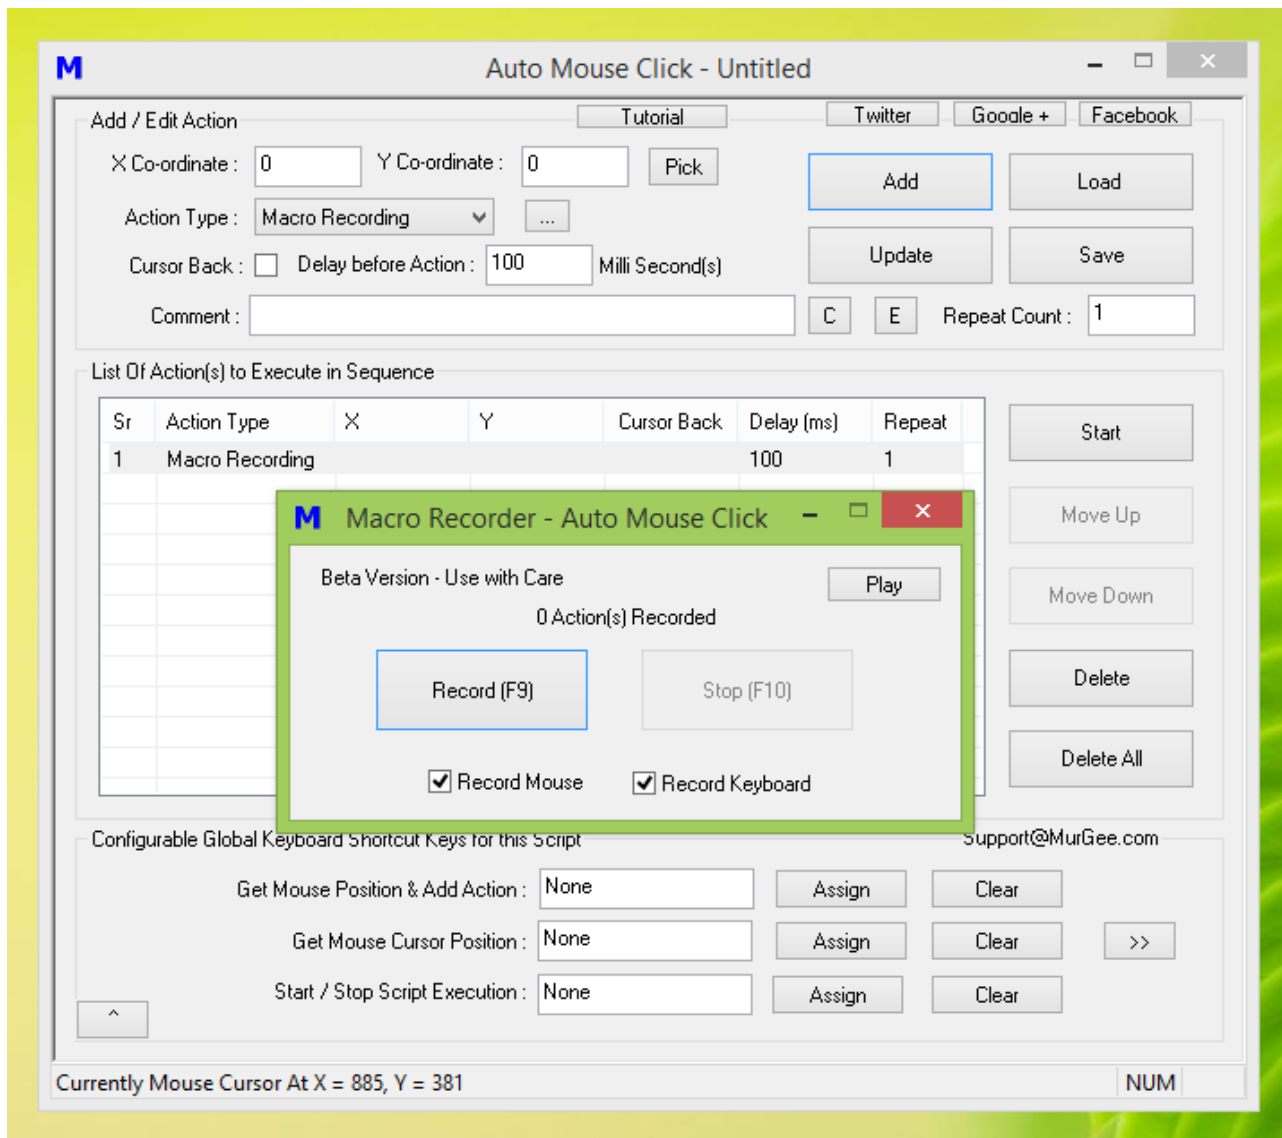

# Macro Recorder

Quick way to Record and Playback Mouse and Keyboard Actions is offered by Macro Recorder. You can find Macro Recorder Shortcut in the Auto Mouse Click Programs Menu. The Macro Recorder has Configurable Keyboard Shortcuts to Start / Stop Recording and Playback.

# Macro Recorder Script Action

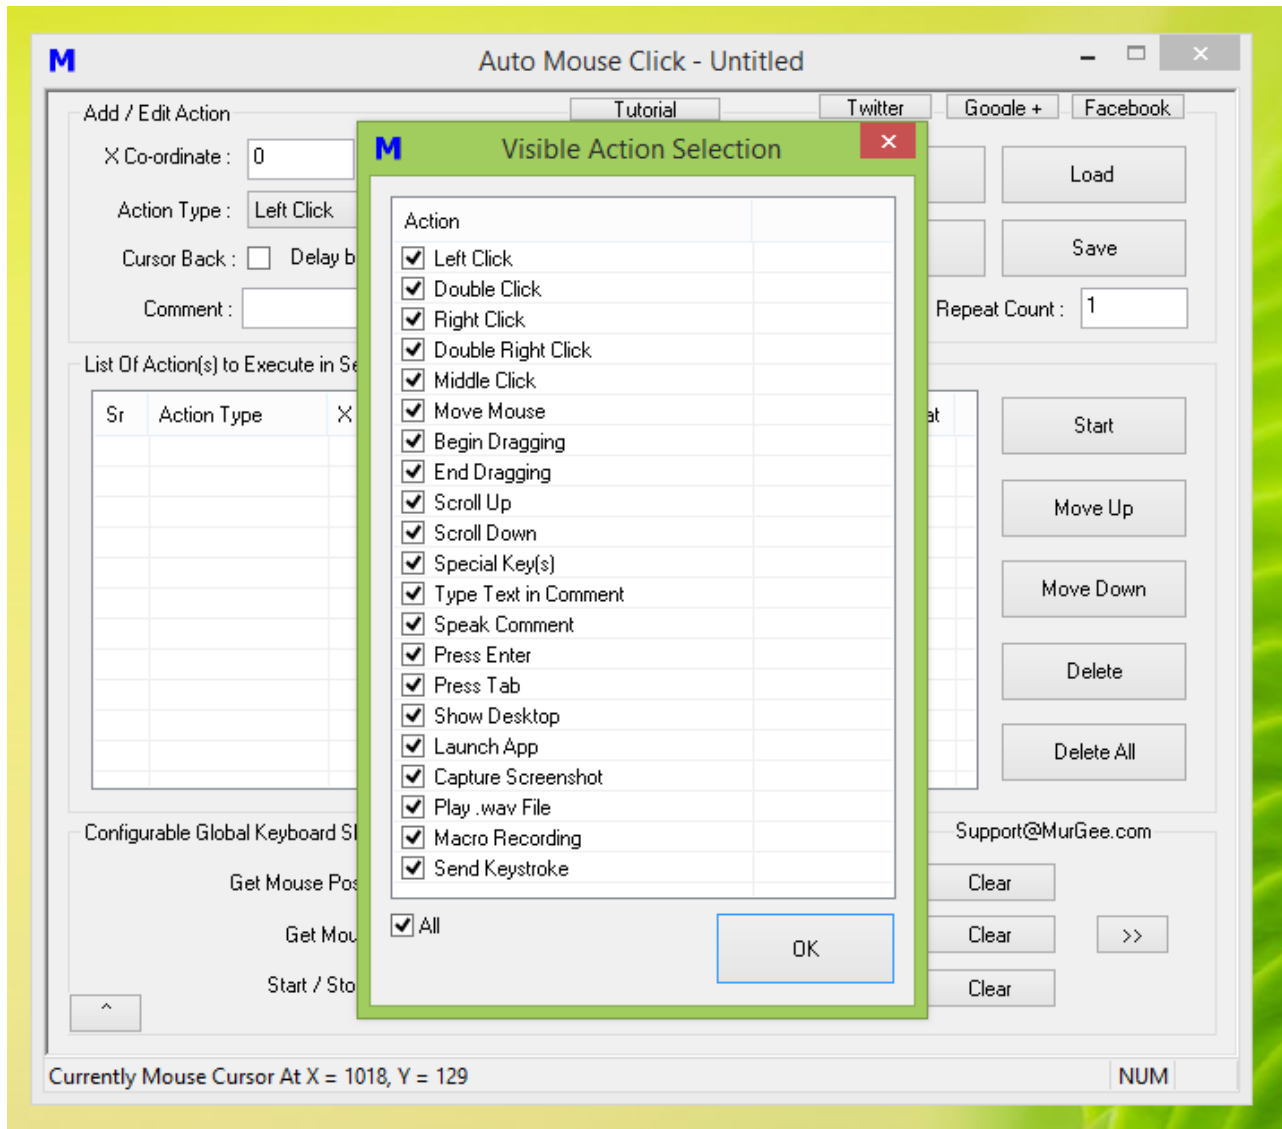

You can even have an embedded Macro Recording within the Auto Mouse Click Script by adding a Macro Recording Action as displayed in the given below screenshot. To get Started, add a Macro Recording Action to the Script and Double Click on it.

# Visible Action Selector

You can Edit the List of Visible Actions for New Auto Mouse Click Scripts by configuring the Visible Action Selector. The Visible Action Selector can be launched from a button located near Action Type Combo on the Main Screen of the Software.

# Inbuilt Video Tutorials

Auto Mouse Click has inbuilt Video Tutorials which can be opened by clicking on the bottom right corner of the software. You can close the Tutorials Screen by clicking again on the button.

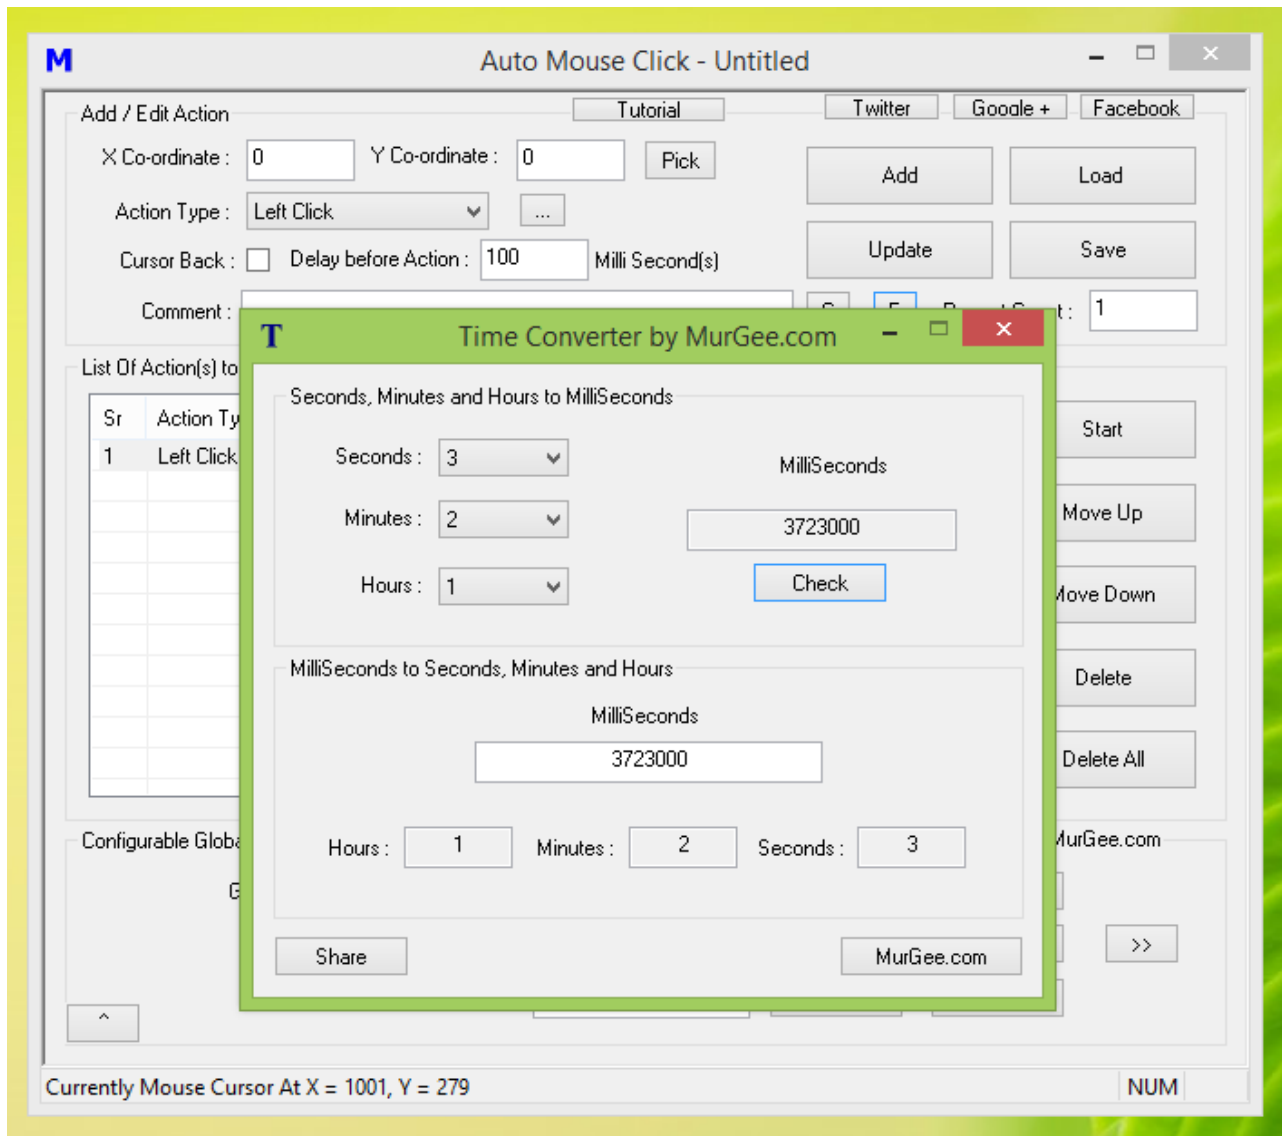

The screenshot displays the 'Auto Mouse Click - Untitled' software window. The interface is divided into several sections:

- Add / Edit Action:** Includes fields for X Co-ordinate (0), Y Co-ordinate (0), Action Type (Left Click), Cursor Back (checkbox), Delay before Action (100 Milli Second(s)), and Repeat Count (1). Buttons for Add, Load, Update, Save, and Pick are present.
- List Of Action(s) to Execute in Sequence:** A table with columns: Sr, Action Type, X, Y, Cursor Back, Delay (ms), Repeat. Below the table are buttons for Start, Move Up, Move Down, Delete, and Delete All.
- Configurable Global Keyboard Shortcut Keys for this Script:** Fields for 'Get Mouse Position & Add Action', 'Get Mouse Cursor Position', and 'Start / Stop Script Execution', each with 'Assign' and 'Clear' buttons.
- Video Tutorials Panel (Right):** Titled 'Video Tutorials', it contains a list of 10 tutorial links. The first visible link is '1. How to Add Mouse Click to the Script'.

At the bottom of the window, it shows 'Currently Mouse Cursor At X = 1239, Y = 127' and a 'NUM' button.

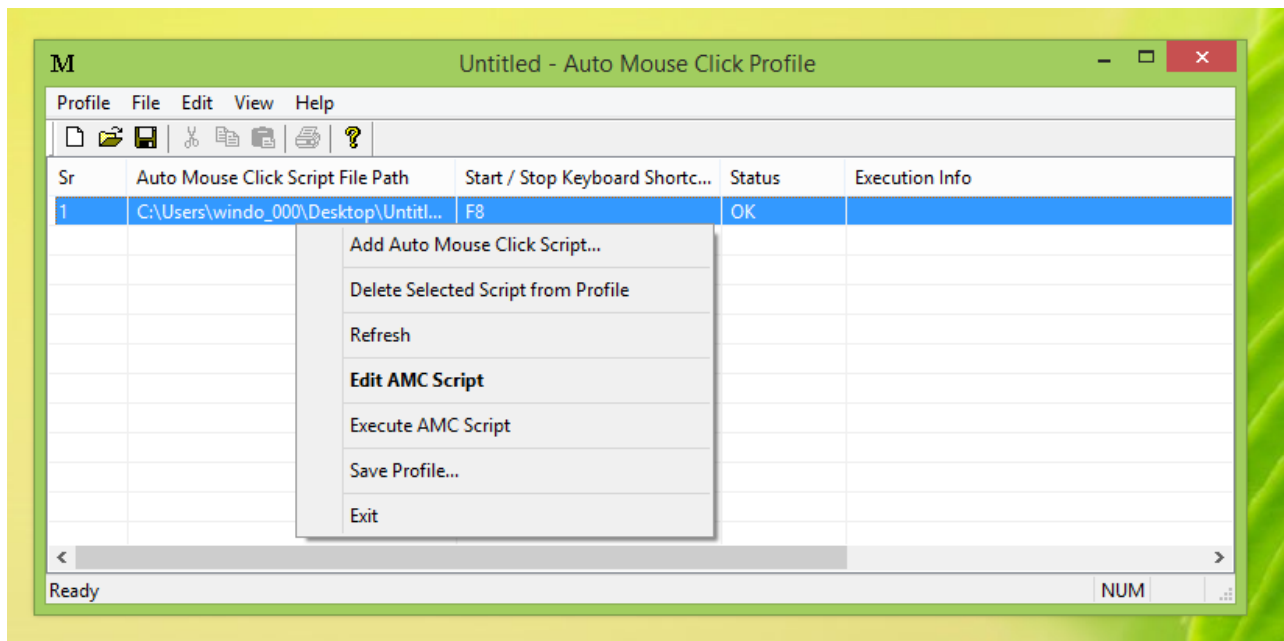

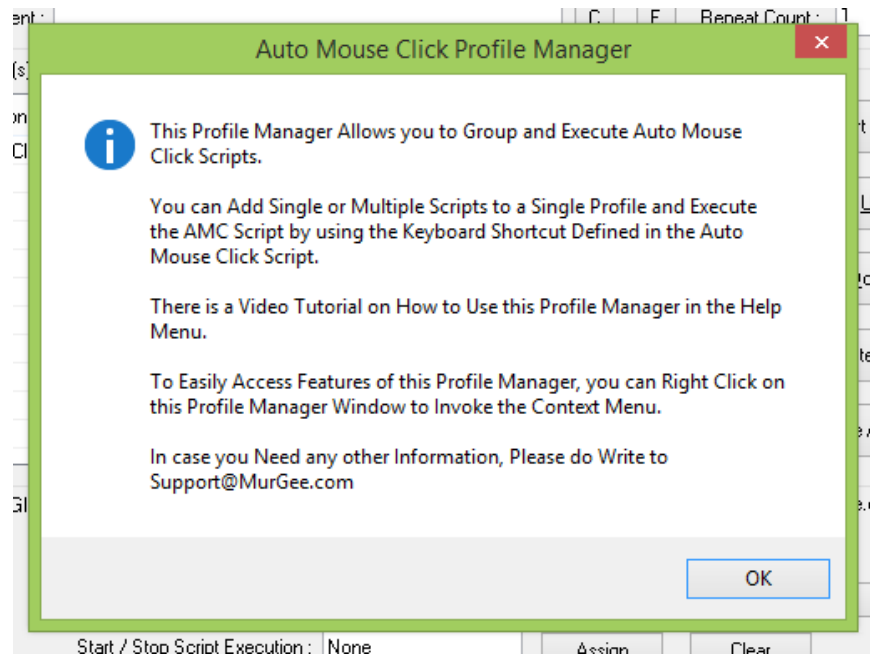

# Time Converter

You can use the inbuilt Time Converter to convert between Hours, Minutes and Seconds to Milli-Seconds and vice versa. You can launch Time Converter from the Right Click Menu of Auto Mouse Click.

# Profile Manager

The Profile Manager allows you to manage Multiple Auto Mouse Click Scripts. The Keyboard Shortcuts defined in Auto Mouse Click Script are loaded by Profile Manager so you can easily Start / Stop Scripts with Profile Manager.
